

The Progress of ATSC 3.0 Rollout from the Broadcaster and Consumer Electronics Perspective

WBA 2021 Broadcasters Clinic Conference

September 10, 2021

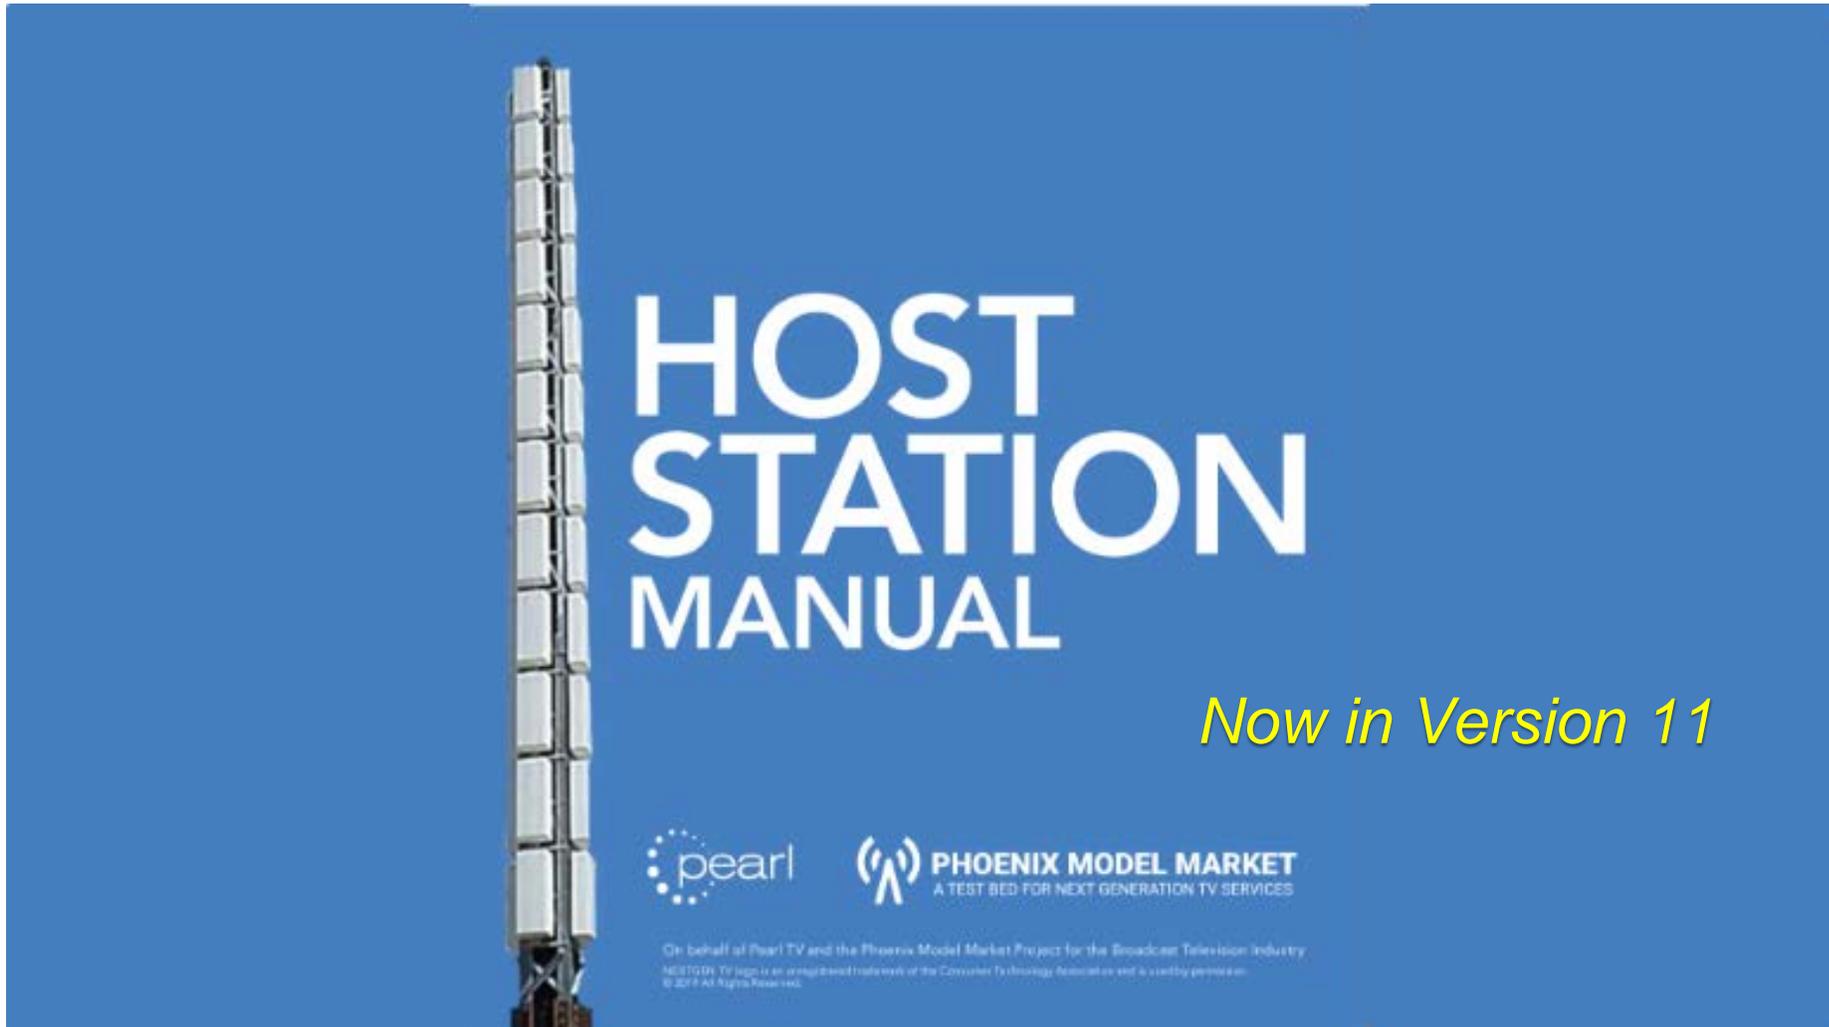

Pearl TV and the Pearl Network Consortia

Pearl TV is a business organization of U.S. broadcast companies with a shared interest in exploring forward-looking broadcasting opportunities, including innovative ways of promoting local broadcast TV content and developing digital media. Pearl's membership is comprised of more than 750 TV stations, owned by nine of the largest US broadcast companies.

The Pearl Network Consortia (PNC)* is a collaborative effort of broadcast organizations is by Pearl TV consists of the 4 major networks as well as the stations associated with Pearl TV that are working together to test, develop and advance the capabilities of NextGen TV powered by the ATSC-3 standard.

**PNC formally known as Phoenix Model Market Partnership*

Host Station Manual

What we will discuss today

- Quick Overview of the Standard
- Status of Market Transitions
- Status of Transmission Equipment
- Status of Consumer Receivers and Sales
- Requirements for NextGen TV Security
- Single Frequency Network Testing
- RUN3TV Application Framework
- Broadband Delivery of NextGen TV

Quick Overview of Standard

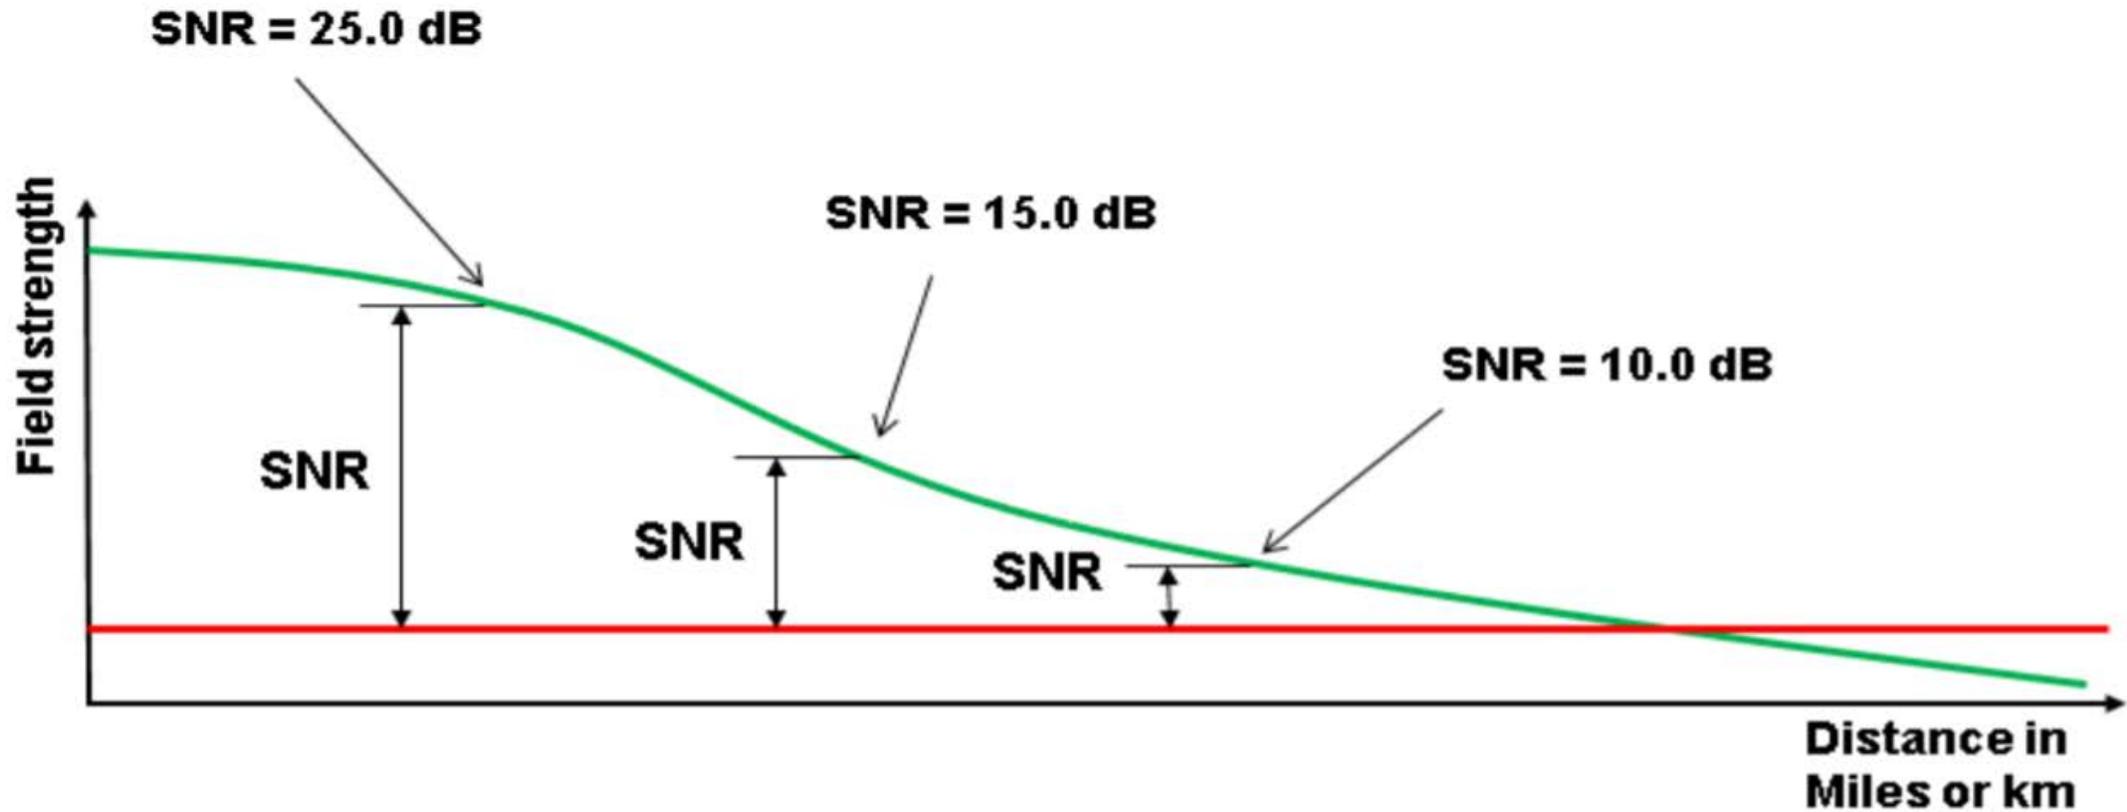

The ATSC-3 NEXTGEN TV Standard

- Six Noteworthy Features
 - Evolvability
 - OTA/OTT Delivery Capability
 - Enhanced Picture Quality (4K, HDR, WCG)
 - Immersive Audio (Voice+ Controllable Dynamic Range)
 - W3C - HTML-5 Broadcaster Application (Viewer Engagement)
 - Content Security and Service Protection

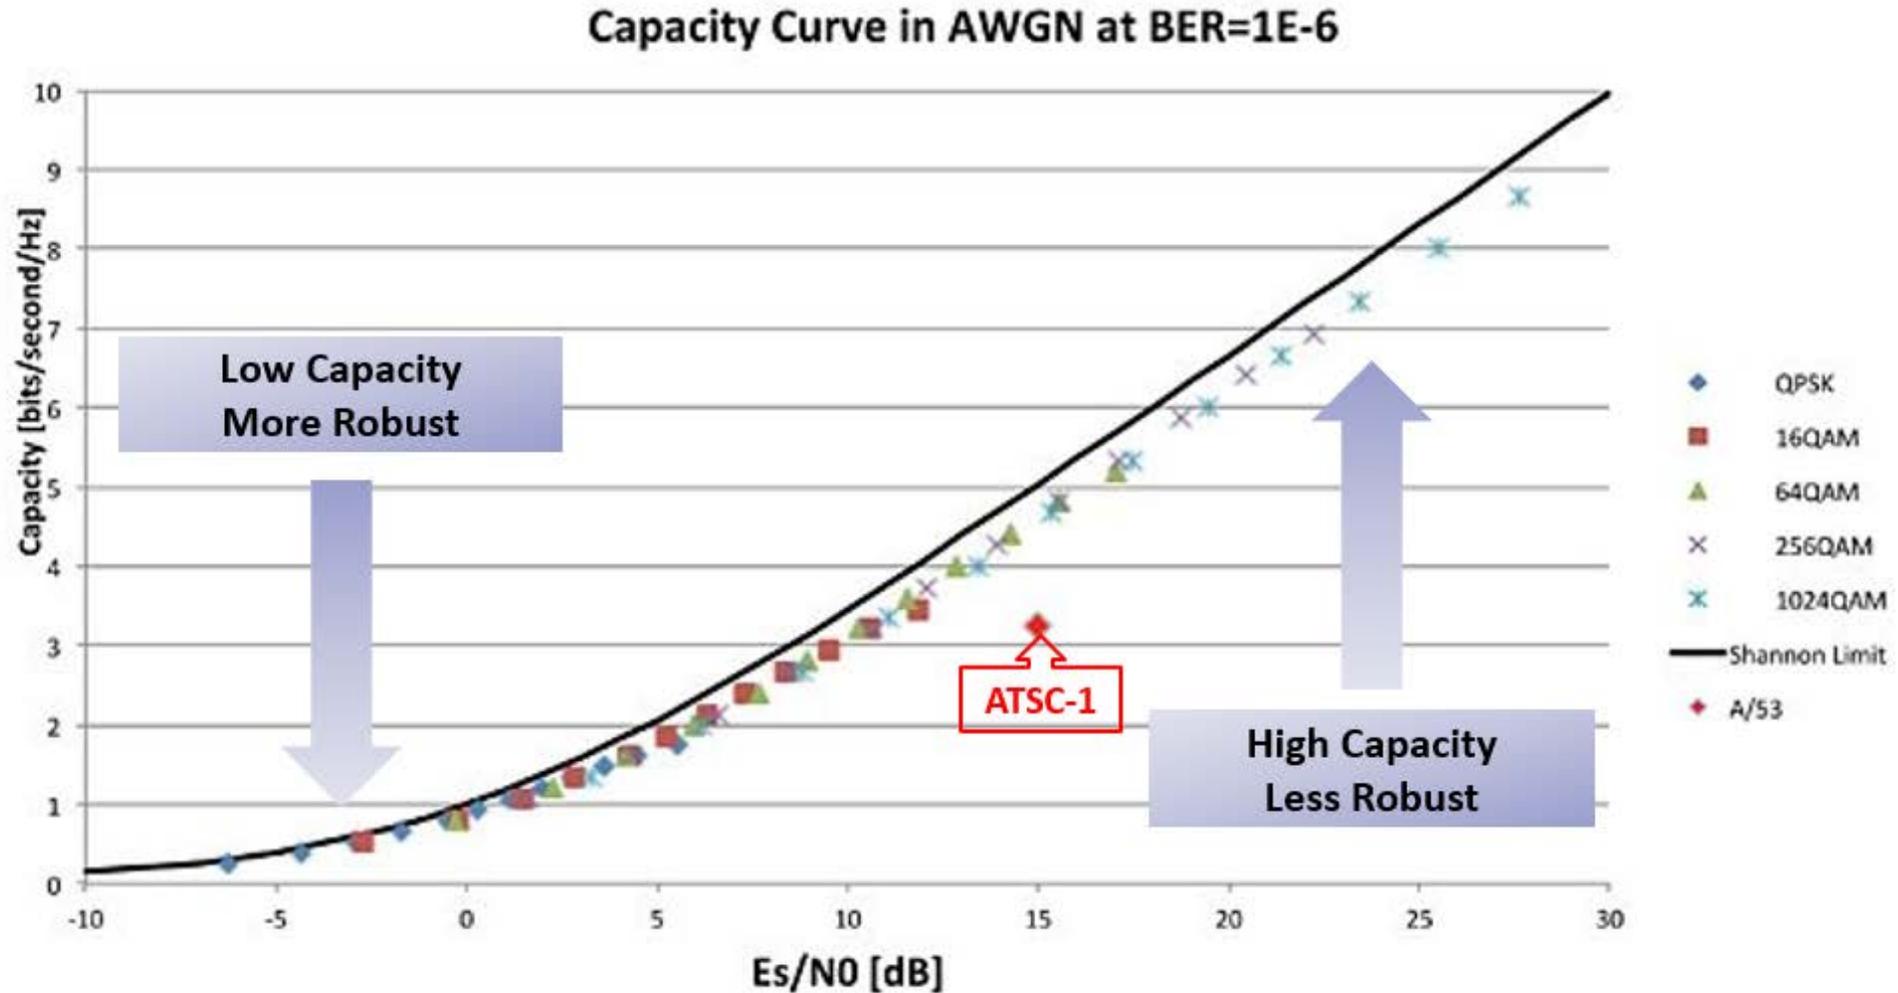

ATSC-3 NEXTGEN TV Standard Underpinnings

- Made up of 22 Individual Standards, 10 recommended Practices, as well as 2 Group Technical Reports
- Well over 1000 pages long and growing
- Based Internet Protocol (IP) and HTML transport
- Uses UDP and Multicast addressing
- Uses COFDM Modulation and LDPC Coding (FEC)
- Requirements for Content and Service Security
- Built in Interactive Capabilities
- Advanced and more efficient video and audio capabilities

Status of the Transition

NextGen TV 2021 Transition Market Statistics

NEXTGEN TV Transition Projections

Through 12/31/21

Total NEXTGEN TV Markets	51
Total NEXTGEN TV Hosts	64
Markets with Two Hosts	13
VHF Sticks as 3.0 Host	2
Total Services Offered via NGTV*	263
% U.S. HH Reached	59.0%

***Broadcast TV services**

Difficult Markets Persist

- Some markets may slip into 1H 2022 based on several factors including: available spectrum, capital availability and personnel bandwidth along with market-specific equipment concerns

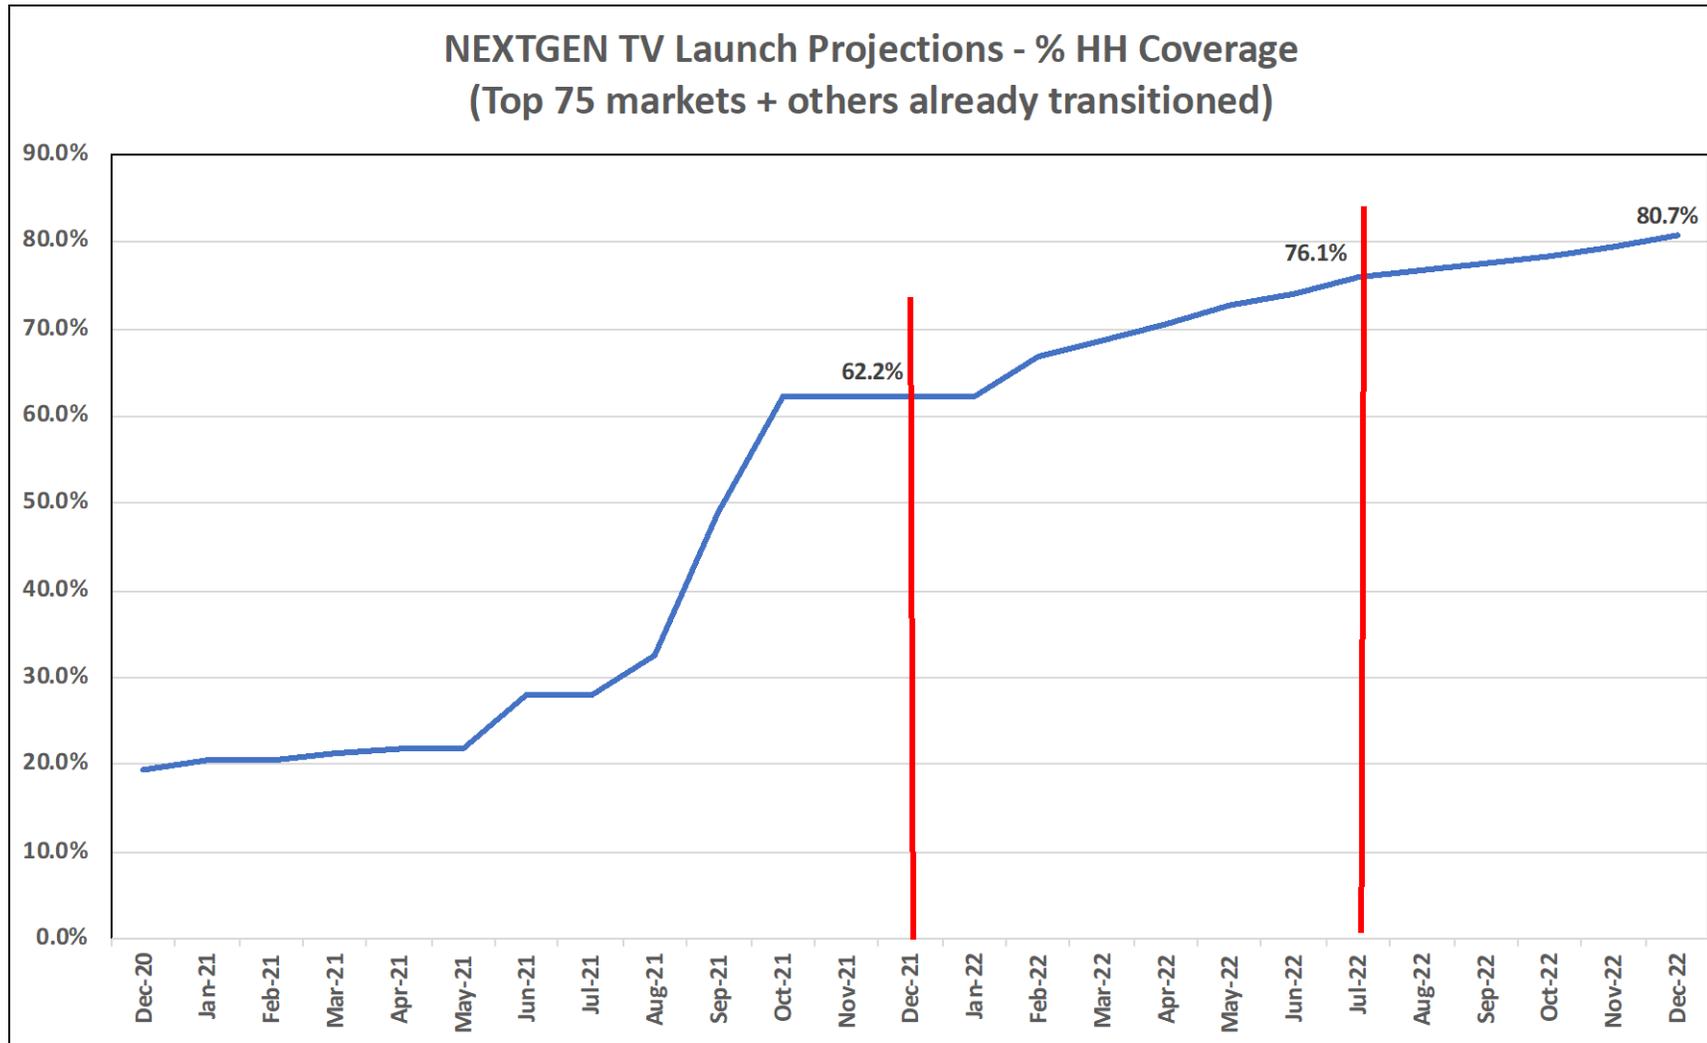

Top 40 Markets:

- Chicago (3)
- Minneapolis (14)
- San Diego (27)
- Greenville-Spartanburg (35)
- Milwaukee (37)

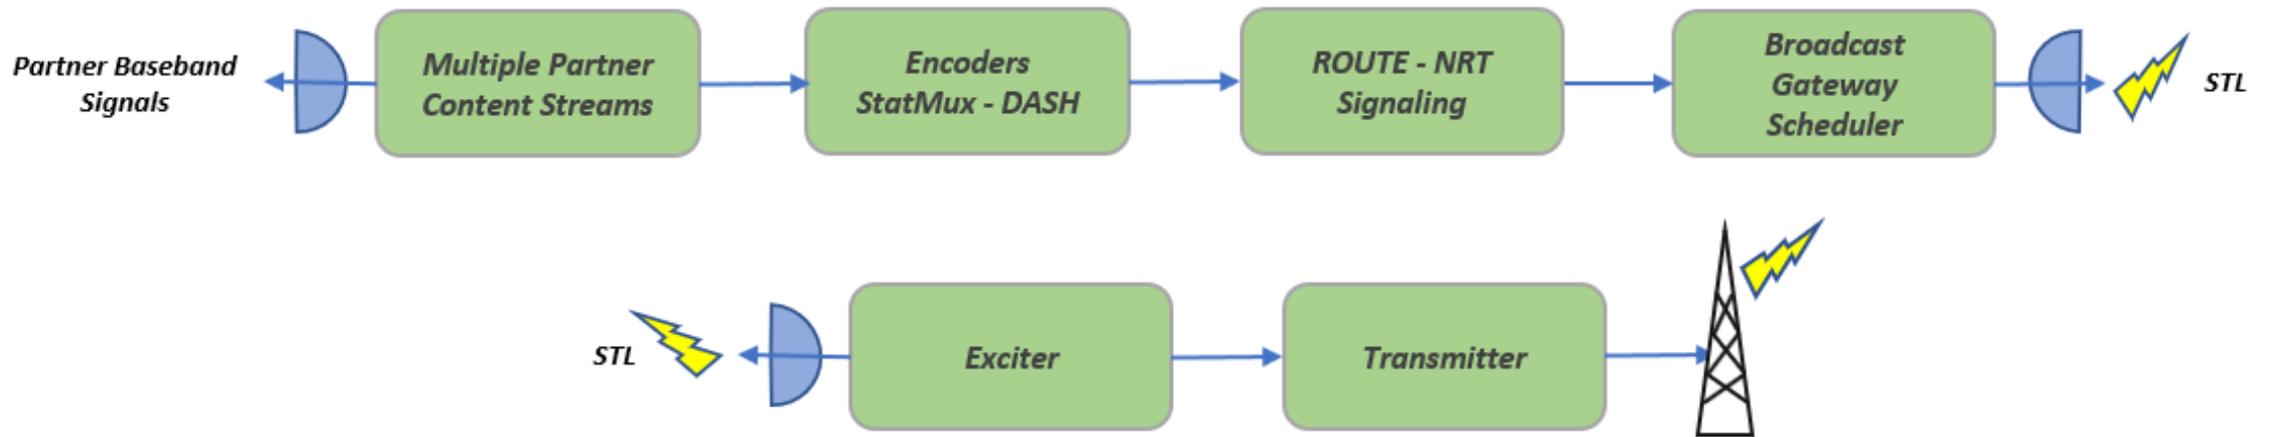

Others in Top ~50:

- Jacksonville (43)
- New Orleans (50)
- Memphis (51)

2021 NEXTGEN TVs: ~70 models for 2021

Manufacturer	Series	Resolution	Panel	Dimensions	Price
SONY	X90J/X90CJ	4K	LCD	50", 55" (2), 65" (2), 75" (2)	Starting at \$1100
SONY	X95J	4K	LCD	65", 77", 85"	Starting at \$3000
SONY	A80J/A80CJ	4K	OLED	55", 65" (2), 77" (2)	Starting at \$1700
SONY	A90J	4K	OLED	55", 65", 83"	Starting at \$2800
SONY	Z9J	8K	LCD	75", 85"	Starting at \$8000
SONY	X92	4K	LCD	100"	Starting at \$20,000
SONY	X80J	4K	LCD	43", 50", 55" (2), 65" (2), 75" (2)	Starting at \$599
SONY	X90CH	4K	LCD	85"	

2021 NEXTGEN TVs: ~70 models for 2021, con't

Manufacturer	Series	Resolution	Panel	Dimensions	Price
SONY	X85J/X85CJ	4K	LCD	43", 50", 55", 65" (2), 75" (2), 85" (2)	Starting at \$1000
SONY	X91CJ	4K	LCD OLED	85" (2)	Starting at \$3000
SONY	XBR-X900H	4K	LCD	55", 65", 75", 85"	Starting at \$1000
LG	G1	4K	OLED	48", 55", 65", 77"	Starting at \$2000
LG	WX	4K	OLED	65"	Starting at \$4000
LG	ZX	4K	OLED	77", 88"	Starting at \$20,000
SAMSUNG	QN900A	8K	QLED	65", 75", 85"	Starting at \$4800
SAMSUNG	QN800A	8K	QLED	65", 75", 85"	Starting at \$3000
SAMSUNG	QN90A	4K	QLED	50", 55", 65", 75", 85"	Starting at \$1400

2021 Devices & 2022 Projections

- LG, Samsung, and Sony will have about 70 models available this year. Lowest list price currently \$599.
- 1 STBs available currently, about 2500 in market. Additional delay due to chip set shortage

Samsung 2021 QN90

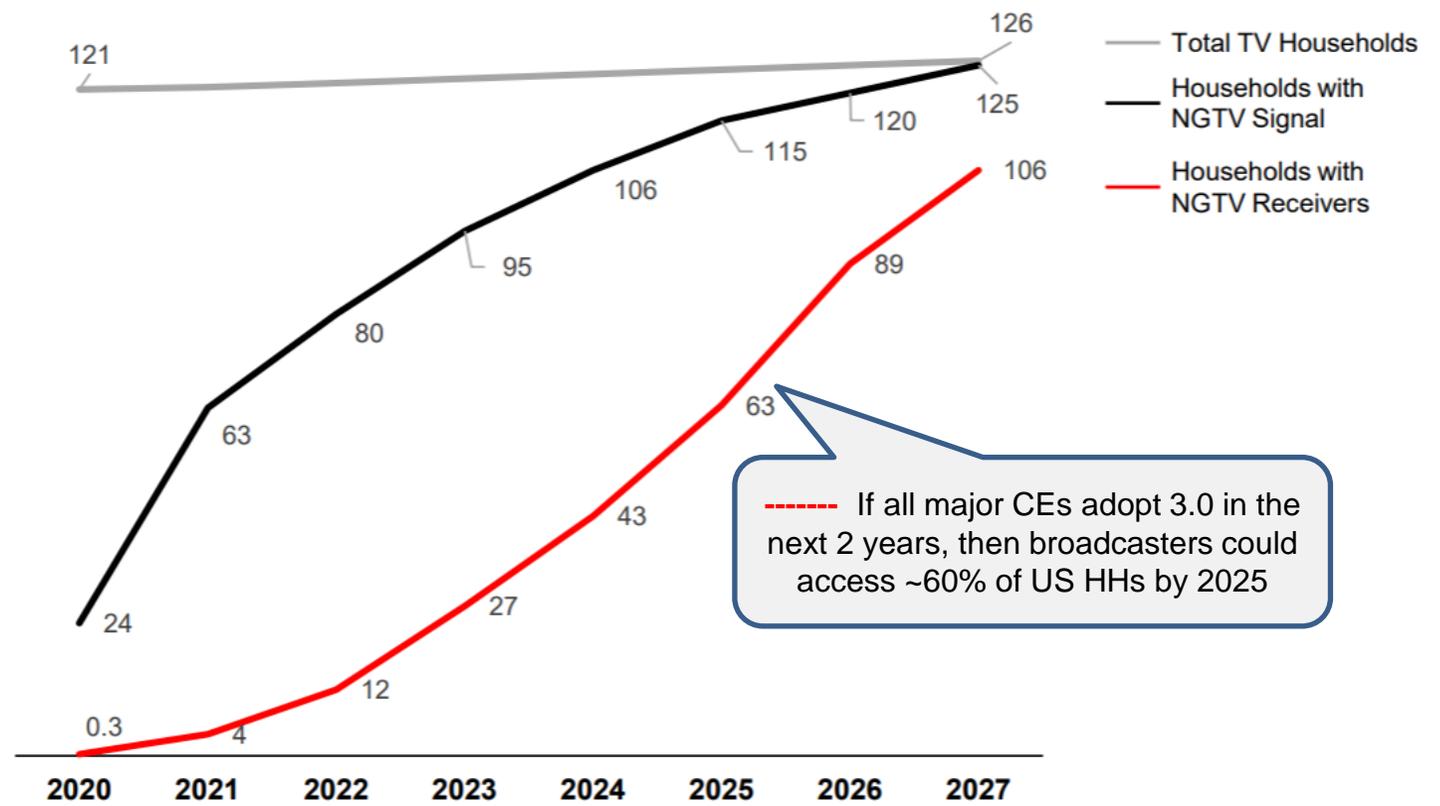

SiliconDust HDHomeRun Connect
\$199

- With the addition of at least 1 new TV OEM, we anticipate 100+ TV models or more for 2022.
- In 2022, we estimate additional low-cost accessory devices ranging from \$60-\$150 that can enable the conversion of existing devices purchased in the last 7 years.

Connected NGTVs Household Penetration

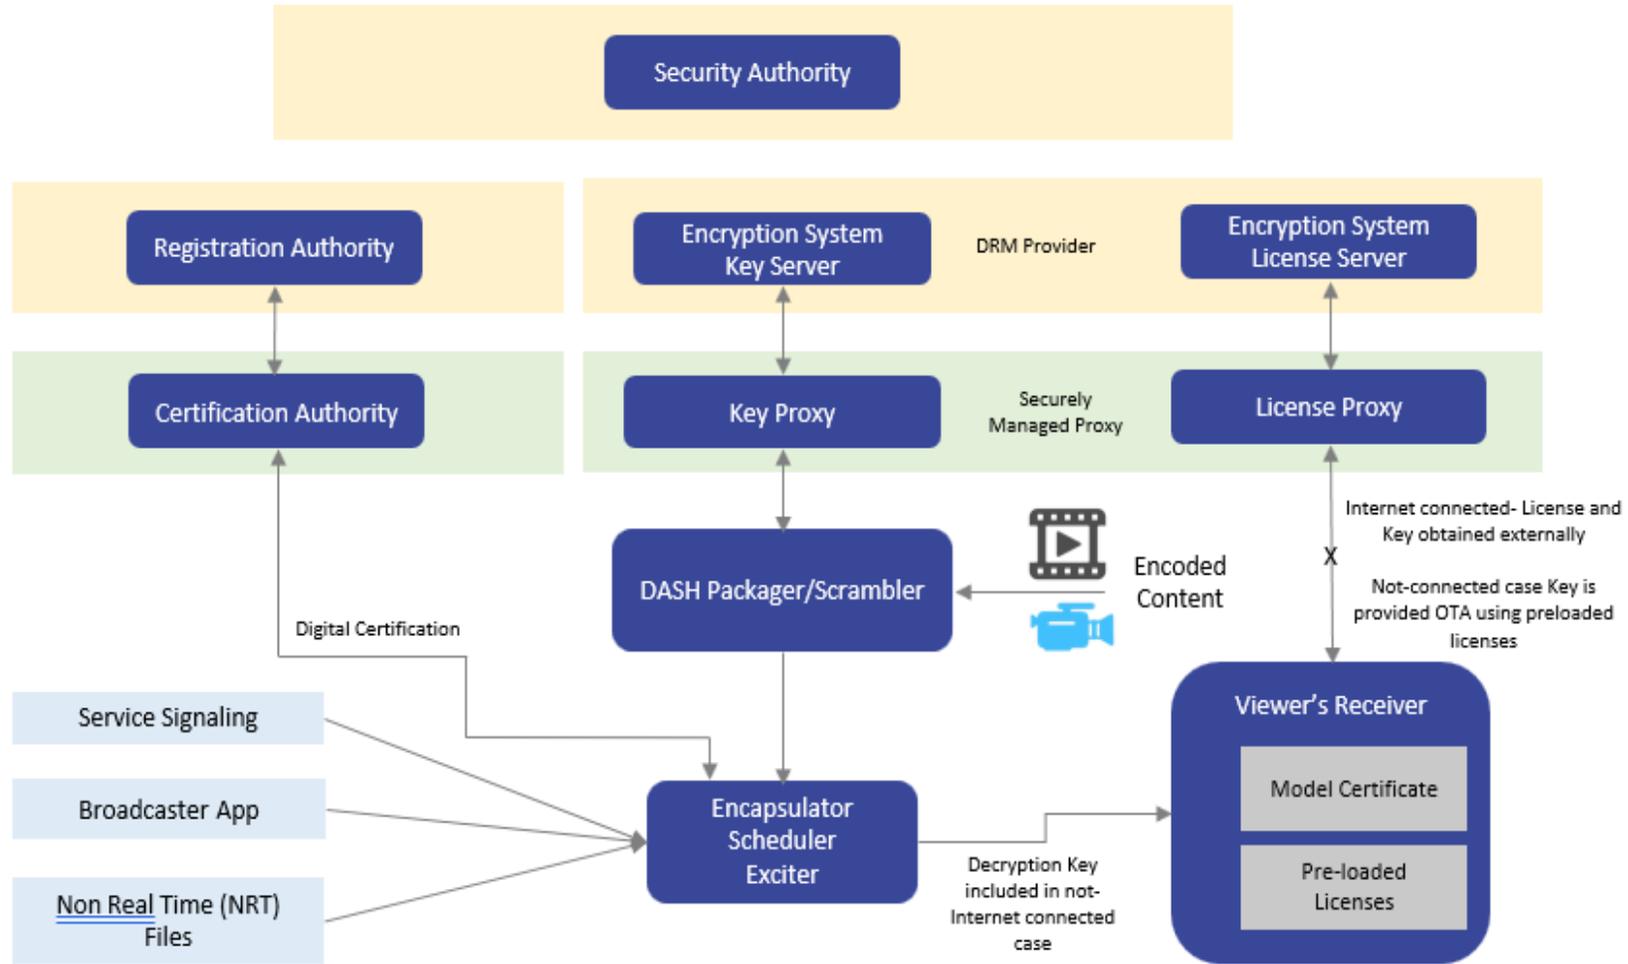

- Sales of 3 MM NEXTGEN TV receivers by end of 2021
- Significant growth of NextGen TV receivers installed base and HH penetration – NGTV receivers are expected to penetrate 100M+ HH by 2027

Single Frequency Network Testing

Pearl TV- Network Consortia Phoenix SFN Test

- Test of PNC/Pearl sponsored SFN In late February and early March of 2021
- KASW on South Mountain (KASW-1) on physical channel 27 at 445kW ERP (110kW Vpol) is eight miles south Phoenix. The SFN has second node located on Shaw Butte (KASW-2) that transmits at an 18.5 kW ERP (4KW Vpol) 18 mile north of downtown Phoenix.
- A single PLP used at a high data rate (24.04 Mbps) and AWGN threshold (16.5 dB) was utilized for this test, providing a relatively sensitive type of reception test
- Absolute error-free reception at 80% (32 out of 40 total sites) 35% of the sites (i.e., 14 out of 40 total sites) had no reception without second node on.
- The median Service Margin for the 40 test sites increased (improved) by about 6 dB from the SFN on versus off at 30 feet and about 10 dB (improved) at 12 feet
- Service Availability (completely error free reception) for the 40 test sites increased (improved) with the SFN on by about 22% for 30 feet and 15% at the 12 feet

RUN3TV Application Framework

Common Application Framework

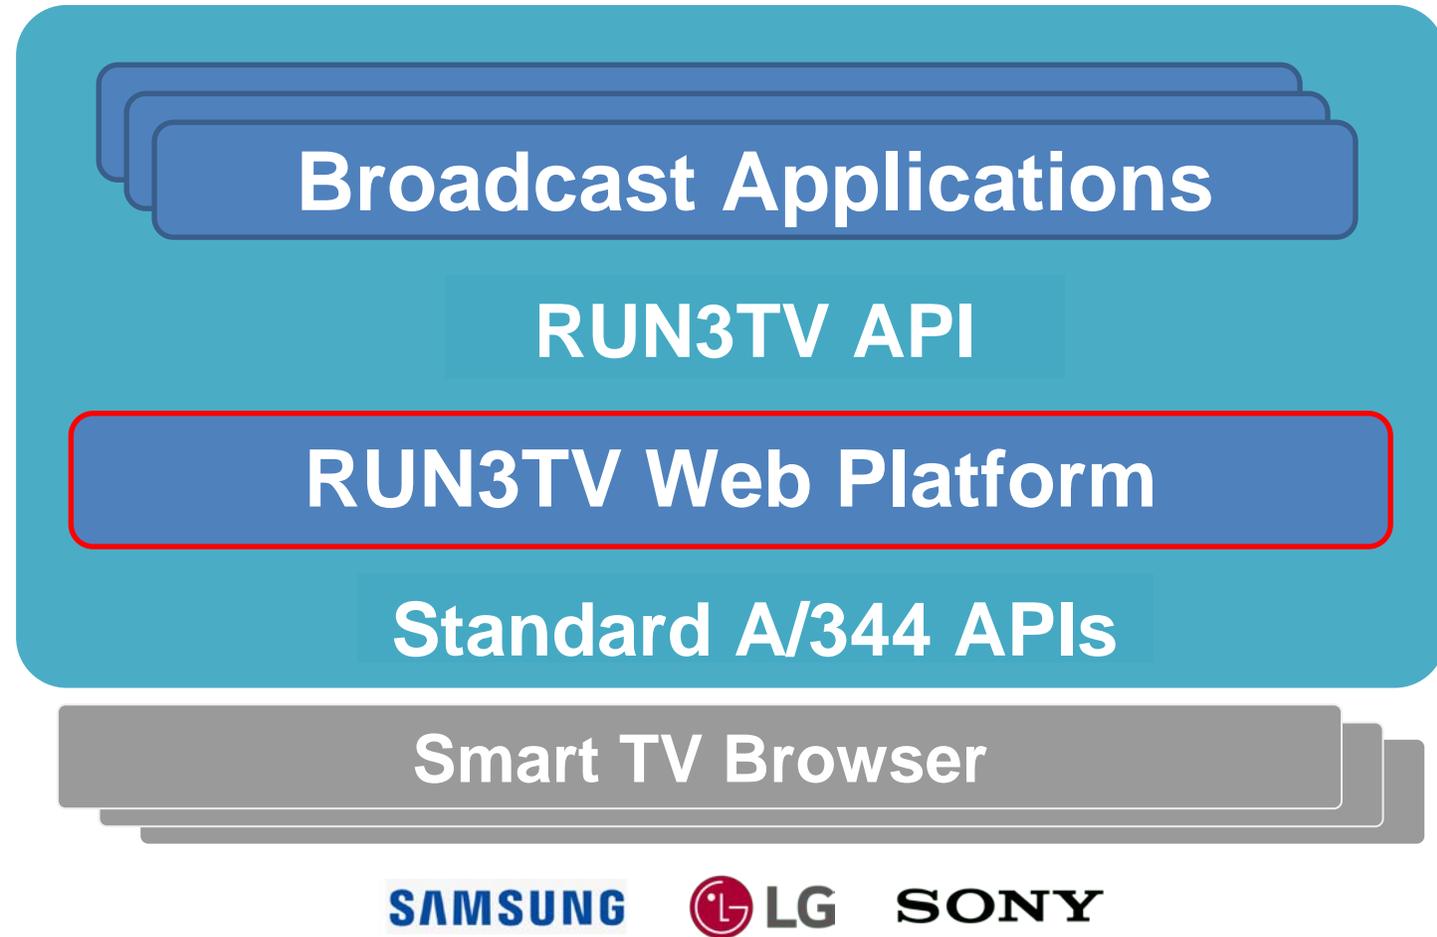

From A/344, "ATSC 3.0 Interactive Content"

Common Application Framework

- RUN3 irons out the differences between the TVs OS
- RUN3 makes application development simple with common web skills
- RUN3 manages the receiver marketplace conformance and sets service requirements
- RUN3 provides onboarding, basic monitoring and support
